METALS

APRIL 2026

The next tin producer in the Mwenda Belt

CONCEPT PLACEHOLDER · NOT A REAL COMPANY

- Four tenements covering 9,780 hectares across the Mwenda Belt of Zambia
- Ten-year mining licence granted at the flagship Kalimba project
- Rock-chip sampling returned up to 28% Sn and 9% Ta₂O₅ from surface workings
- Over 250 pegmatite targets ranked from satellite imagery and field mapping
- Pilot alluvial plant planned for commissioning in the second half of 2026
- Board combining mining finance, in-country operations and governance

Alex Morgan

CHIEF EXECUTIVE OFFICER

Twenty years in mining finance and advisory across Africa and Australia.

Thandiwe Banda

DIRECTOR

Three decades in Zambian mining operations and project management.

Piet van der Merwe

DIRECTOR

Mining engineer with operational roles on four continents.

Claire Whitfield

NON-EXECUTIVE DIRECTOR

Governance and regulated financial services specialist.

Critical metals & our projects

Sn

Tin — solder for semiconductors and electronics

Ta

Tantalum — capacitors, aerospace and medical

Li

Lithium — battery storage and electric vehicles

KALIMBA

Sn · Ta · Nb

Surface sampling across the Kalimba West tin field confirms high-grade tin and tantalum over a strike of more than two kilometres.

SAMPLE	SN %	TA ₂ O ₅ %
KB-01	28.4	9.1
KB-02	21.7	6.3
KB-03	17.2	4.8
KB-04	12.9	3.1

NSANJE HILL

Sn

Historic workings with hard-rock potential

Artisanal tin workings dating back decades, with pegmatite outcrops mapped along a newly restored access road.

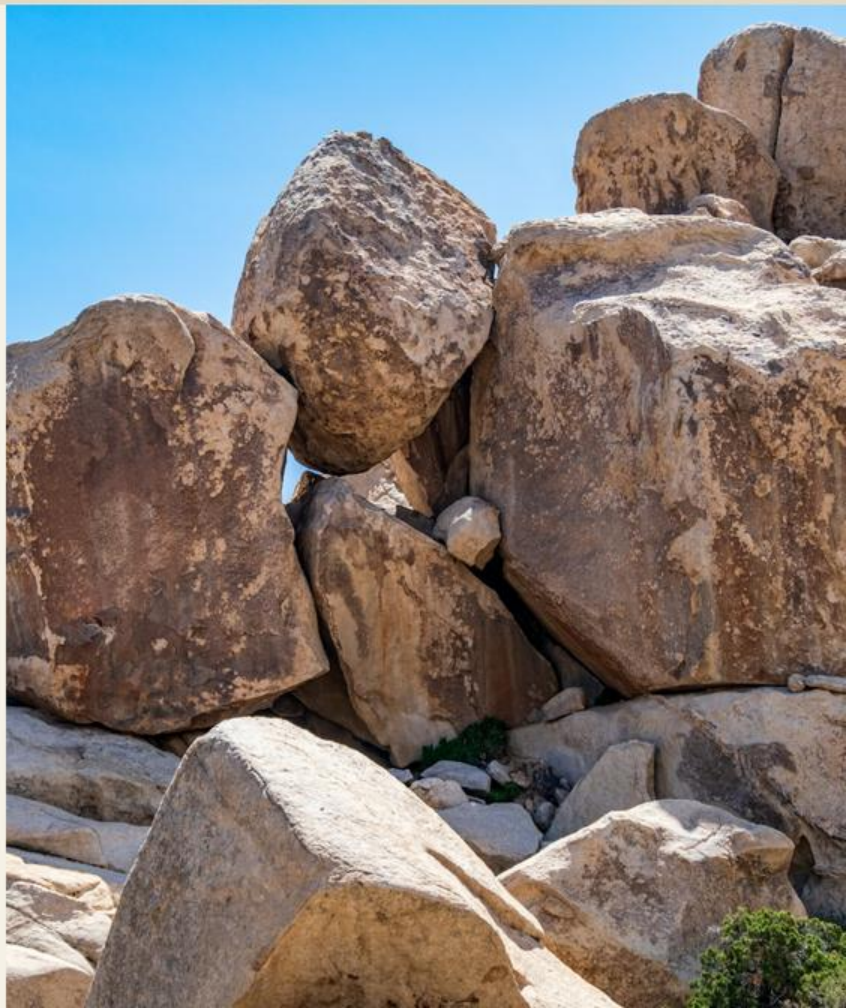

CHIWALA

Li · Sn

The largest licence in the portfolio

6,050 hectares with lithium, tin, tantalum and niobium structures extending into the eastern block. Mapping and trenching programme under way.

- Access roads rebuilt and open to local traffic
- Local hiring and training for field crews
- Protective equipment for artisanal miners
- Environmental approval secured before ground is broken

THANK YOU
